Utilising overseen resources
in the Danish merchant marine

*What does social capital mean
for your company's bottom line?*

”Arrive safely”

Managing Director Connie S. Gehrt, SEAHEALTH Denmark

MSSM is a conference focusing on the issues that concern the maritime industry. The conference is a good mixture of presentations and workshops and with plenty of time to get inspired and to network.

At the conference “The Blue Denmark” shows the results obtained for the Danish merchant fleet and also how to keep the fleets leading position on safety, health and environment in the future.

You will gain inspiration on safety, health and environment to use in your daily work aboard as well as in company office.

You will receive a Danish/English Certificate for your participation.

During the MSSM 2011 conference a number of suppliers and manufacturers of maritime equipment will exhibit their products. You will be able to get a good chat and get a lot of information about maritime equipment and products.

MSSM 2011

Current problems to debate and the newest scientific results e.g.:

- Overseen resources in the company – how is it put into action?
- What is social capital and what should it be used for?
- Piracy – the safety situation and crisis counseling
- A career as Seafarer – What is needed?
- Occupational health and shipbuilding
- Social isolation – What is to be done?
- Customers and conflict management
- Food economics, hygiene and health
- Planned maintenance – money saved?
- Social networks – can it be used in the maritime?
- Environment, fuel and ballast water
- Multi culture and “company-language”
- Communication and management at a distance
- Safety culture

Exercise, walk-the-talk and football will be scheduled in the program

www.mssm.dk

Visit www.mssm.dk, where we up til the conference will put informations about the program, prices etc.

During March 2011 the registration will open and you will be able to submit it on www.mssm.dk. Early-birds can register at a reduced price before 1 June 2011.

- Inspiration
- Experience exchange
- Knowledge and scientific results
- Networking
